🎓 EDUCATION

University of California, Berkeley

Aug 2025 – Jun 2027

B.S. Electrical Engineering and Computer Sciences (EECS)

Coursework: CS 61B, CS 70, EECS 16A

Stanford University (Summer Session)

Summer 2025

CS 229: Machine Learning

De Anza College & Foothill College

Sep 2023 – Jun 2025

A.S. Computer Science

GPA: 4.0/4.0

Phi Theta Kappa Honor Society · Academic Director, Quantum Club · President, Data Club

Gaokao (Chinese national college entrance exam): Grade 12 top 0.16% (700 / 445,000); Grade 10 top 0.86% (3,000 / 349,000, taken 2 years early)

🧰 EXPERIENCE

Co-Founder & CTO, Ludus

Apr 2026 – Present

- Building an outcome-first marketplace for AI agent work. 9 agents integrated (Claude Code, Codex CLI, Gemini CLI, GitHub Copilot, Hermes Agent, Factory Droid, Forge, Perplexity Agent); tasks routed to multiple agents in parallel, users pay only for the result they keep.
- Built full stack: React/TypeScript frontend, Node.js/Hono backend, Neon Postgres, Docker-based agent execution on VM nodes with remote dispatch. Deployed on Cloudflare Pages/Workers + Railway.

ENGR Team Co-Lead, UC Berkeley BAIR – Agent's Last Exam (ALE)

Jan 2026 – Present

- Co-first author on ALE, a NeurIPS 2026 benchmark submission led by Prof. Dawn Song, evaluating whether AI agents can deliver production-grade economic value across 90%+ of non-physical industries.
- As the primary builder, filtered 1,000 noisy expert-submitted tasks to 300 using parallel agents, then engineered each into a standardized, execution-ready benchmark under a unified evaluation architecture covering 55 sub-fields across 13 industry clusters.

Software Engineering Intern, Geopogo

Sep 2025 – Dec 2025

- Sole engineer on AI architectural rendering platform shipped to production. Built end-to-end: Google Gemini API integration, RunwayML text-to-video pipeline, React/TypeScript frontend, FastAPI backend, Firebase auth, Vercel CI/CD deployment.

Student Ambassador, Fetch.ai Innovation Lab

Sep 2024 – Oct 2025

- Mentored 20+ teams at CalHack 11.0 (UC Berkeley) and SF Hacks on full-stack development.
- Scouted early-stage startups at Bay Area Founders Club demo summits (5,000+ startups, 1,000+ VCs) on behalf of Fetch.ai; reported shortlists to Innovation Lab lead Sana Wajid for investment follow-up.

Research Intern, Prof. Hao Wang – Stevens Institute of Technology

Jun 2024 – Feb 2026

- Built personalized federated learning systems with differential privacy guarantees in PyTorch/TensorFlow. Focus on protecting local data while accelerating on-device model personalization.

📁 PROJECTS

Context8 – context8.org

Oct 2025 – Jan 2026

- Self-evolving Stack Overflow for AI agents. Community vote/feedback loop turns one agent's solved bug into reusable knowledge for all agents. Built solo. Two months after shipping, Andrew Ng's Context Hub and Evomap launched in adjacent directions.

AI Mario Level Generator – mario-hackmit.vercel.appSep 2025

HackMIT 2025 – Modal Sponsor Prize

- Sketch-to-playable-level pipeline: LLaVA 1.5 for sketch interpretation, H100 GPU inference on Modal, FastAPI backend, React frontend with OpenCV integration. Live demo.

Stud.aiSep 2024

HackMIT 2024 – “Smartest AI Agent” Award

- Chrome extension + AI agent that turns assignment rubrics into step-by-step timelines and auto-schedules work blocks on students’ calendars.

 PUBLICATIONS

May 2026

Agent’s Last Exam (ALE) – NeurIPS 2026 Evaluations and Datasets Track submission.

Co-first author. Benchmark of 1,000+ real-world agent tasks across 55 sub-fields and 13 industry clusters, led by 300+ industry experts. Led by Prof. Dawn Song, UC Berkeley.

 AWARDS

Modal Sponsor Prize, *HackMIT* (MIT)Sep 2025

“Smartest AI Agent” Award, *HackMIT* (MIT)Sep 2024

Best Use of .Tech Domain, *HackDavis*Apr 2024

Winner, *Hack for Impact* (UC Berkeley)Feb 2024

First Prize, Jiangsu Province Chinese National Physics Olympiad2022

 SKILLS

- Languages:** Python, TypeScript/JavaScript, C++, Java, Rust
- Frameworks:** React, Node.js, FastAPI, Hono, PyTorch, TensorFlow
- Infrastructure:** Docker, Cloudflare Workers, Railway, Vercel, Neon Postgres, Firebase, Modal
- AI Tools:** Claude Code, Codex, Cursor, Gemini CLI
