

Yuanbo Pang

yuanbopang@berkeley.edu | 408-460-7526 | Berkeley, CA | linkedin.com/in/yuanbopang | github.com/PangYuanbo | yuanbopang.pro

UC Berkeley EECS student building AI agent evaluation, infrastructure, and robotics/vision systems; co-first author on the NeurIPS 2026 Agent's Last Exam benchmark submission.

SKILLS

Languages: Python, TypeScript/JavaScript, C++, Java, Rust | **AI/Agents:** agent harnesses, GCUA evaluation, benchmark design, LLaVA, Gemini API, PyTorch, TensorFlow | **Infra/Product:** FastAPI, React, Node.js, Docker, Linux, Git, REST APIs, CI/CD, Firebase, Vercel, Modal | **Robotics/Vision:** 3D perception, UAV detection, optical flow, OpenCV

EDUCATION

University of California, Berkeley B.S. Electrical Engineering and Computer Sciences (EECS) • Coursework: CS 61B, CS 70, CS 170, EECS 16A, EECS 106A.	Berkeley, CA Aug 2025 - Dec 2026
Stanford University, Summer Session CS 229: Machine Learning	Stanford, CA Summer 2025
Community College Coursework Computer Science coursework at De Anza, Foothill, Evergreen, and Diablo Valley; Phi Theta Kappa; Academic Director, Quantum Club; President, Data Club	Cupertino, CA Sep 2023 - Jun 2025

EXPERIENCE

Full-Stack Engineer, Ludus AI agent marketplace, full-stack systems, agent execution • Built outcome-first marketplace where multiple coding/research agents execute the same task in parallel and users pay only for accepted results. • Built React/TypeScript frontend, Node/Hono backend, Neon Postgres task store, and Docker-based VM dispatch layer for agent execution.	Remote Apr 2026 - Present
ENGR Team Co-Lead, UC Berkeley BAIR - Agent's Last Exam (ALE) AI agent evaluation, benchmark infrastructure, agent harnesses • Co-first author on ALE, a NeurIPS 2026 benchmark submission led by Prof. Dawn Song for evaluating frontier AI agents on long-horizon professional workflows. • Primary builder for converting expert-submitted real-world tasks into executable benchmark instances across 55 sub-fields and 13 industry clusters. • Built evaluation infrastructure for VM-based GUI/CLI workflows, reproducible harness runs, and deliverable-based scoring.	Berkeley, CA Jan 2026 - Present
Robotics AI Engineering Intern, Starbot Agent harness for restaurant service robots • Built agent harness for restaurant service robots with tool APIs, task-state orchestration, and recovery paths for ordering, delivery, and customer-service workflows. • Designed tool interfaces, task state handling, and recovery paths to make real service workflows reliable enough for live demo settings. • System was demonstrated at CES 2026 and covered by NHK News, one of Japan's leading national media outlets.	Remote Dec 2025 - Feb 2026
Software Engineering Intern, Geopogo AI rendering platform, full-stack production engineering • Shipped production AI architectural rendering platform as sole engineer, implementing React/TypeScript frontend, FastAPI backend, Firebase auth, and Vercel CI/CD. • Integrated Gemini image reasoning and RunwayML text-to-video workflows with drag-and-drop uploads, real-time previews, and credit-based subscriptions.	Berkeley, CA Sep 2025 - Dec 2025
Undergraduate Researcher, UC Berkeley - Prof. Avidesh Zakhor UAV perception, optical flow, small-object detection • Benchmarked UAV detection/tracking methods against 1,600 manually annotated DJI frames. • Evaluated optical-flow and background-compensation pipelines for tiny-object tracking and low-false-positive perception.	Berkeley, CA Mar 2026 - Present
Research Intern, Prof. Hao Wang - Stevens Institute of Technology Personalized federated learning, differential privacy, PyTorch/TensorFlow • Built personalized federated learning systems with differential privacy guarantees in PyTorch/TensorFlow to protect local data while accelerating on-device model personalization.	Hoboken, NJ Jun 2024 - Feb 2026

PROJECTS

Context8 - context8.org Agent knowledge systems • Built solo self-evolving Stack Overflow for AI agents where community votes and feedback turn one agent's solved bug into reusable knowledge for all agents.	Oct 2025 - Jan 2026
Stud.ai HackMIT 2024 - Smartest AI Agent Award • Built Chrome extension and AI agent that turns assignment rubrics into step-by-step timelines and auto-schedules work blocks on students' calendars.	Sep 2024
AI Mario Level Generator - mario-hackmit.vercel.app HackMIT 2025 - Modal Sponsor Prize • Built sketch-to-playable-level pipeline using LLaVA 1.5, H100 GPU inference on Modal, FastAPI, React, and OpenCV.	Sep 2025

PUBLICATIONS

Agent's Last Exam (ALE) - NeurIPS 2026 Evaluations and Datasets Track submission • Co-first author. Benchmark of 1,000+ real-world agent tasks across 55 sub-fields and 13 industry clusters, led by 300+ industry experts and Prof. Dawn Song, UC Berkeley.	May 2026
--	-----------------

AWARDS

Modal Sponsor Prize, HackMIT 2025; Smartest AI Agent Award, HackMIT 2024; Best Use of .Tech Domain, HackDavis 2024; Winner, Hack for Impact 2024; First Prize, Jiangsu Province Chinese National Physics Olympiad 2022.
