EDUCATION

University of California, Berkeley <i>B.S. Electrical Engineering and Computer Sciences (EECS), Aug 2025 - Dec 2026</i> Coursework: CS 61B, CS 70, CS 170, CS 184, EECS 16A, EECS 106A. Stanford Summer School 2025: CS 229 Machine Learning.	Berkeley, CA
De Anza Community College <i>Computer Science transfer coursework, Sep 2023 - Jun 2025</i>	Cupertino, CA

SKILLS

Quant/Research: Python, C++, algorithms, ML, experiment design, data validation, model benchmarking
ML/Systems: PyTorch, TensorFlow, CUDA, SQL, PostgreSQL/Neon, Docker, Linux
Engineering: TypeScript, FastAPI, REST APIs, Redis, Codex, Cursor, optical-flow evaluation, statistical debugging

EXPERIENCE

Undergraduate Researcher, UC Berkeley - Prof. Avidesh Zakhor <i>UAV detection benchmarking, data validation</i> - Created and used 1,600-frame annotation set to evaluate small-object detection and tracking methods under camera motion. - Compared optical-flow and background-compensation pipelines to reduce false positives in tiny airborne object tracking.	Mar 2026 - Present
Software Engineering Intern, Geopogo <i>AI rendering platform analytics and product workflows</i> Built production platform flows around user uploads, model outputs, credit usage, and real-time previews across frontend and backend systems.	Sep 2025 - Dec 2025
Research Intern, Prof. Hao Wang - Stevens Institute of Technology <i>Federated learning and privacy-preserving ML</i> Built personalized federated learning experiments with differential privacy guarantees in PyTorch and TensorFlow.	Jun 2024 - Feb 2026

PROJECTS

UAV Detection Evaluation <i>Research data, benchmarking, validation</i> Annotated and evaluated drone-video frames to compare tiny-object detection and motion-compensation approaches.	Mar 2026 - Present
AI Mario Level Generator <i>Computer vision and generative pipeline</i> Built vision-to-game pipeline with LLaVA, OpenCV, FastAPI, and React.	Sep 2025
