EDUCATION

University of California, Berkeley <i>B.S. Electrical Engineering and Computer Sciences (EECS), expected Dec 2026</i> Coursework: Data Structures, Algorithms, Machine Learning, Discrete Math, Linear Algebra, Robotics.	Berkeley, CA
Stanford University, Summer Session <i>CS 229: Machine Learning</i>	Stanford, CA

SKILLS

Robotics/Embedded-adjacent: C++, Python, OpenCV, 3D perception, UAV tracking, optical flow, robot task workflows
Systems: Linux, Docker, Git, REST APIs, performance-minded tooling
AI: PyTorch, TensorFlow, LLaVA, agent harnesses

EXPERIENCE

Robotics AI Engineering Intern, Starbot <i>Service robot agent workflows</i> Built task orchestration and recovery paths for restaurant service robot workflows; system was demonstrated at CES 2026 and covered by NHK News.	Dec 2025 - Feb 2026
Undergraduate Researcher, UC Berkeley - Prof. Avideh Zakhor <i>UAV perception, optical flow, small-object tracking</i> Evaluated detection and tracking pipelines for tiny airborne objects using annotated drone video and motion-cue analysis.	Mar 2026 - Present
ENGR Team Co-Lead, UC Berkeley BAIR - Agent's Last Exam <i>Evaluation harnesses for embodied/GUI workflows</i> Built reproducible GUI/CLI evaluation flows with artifact capture and state-based scoring.	Jan 2026 - Present

PROJECTS

AI Mario Level Generator <i>Vision pipeline and playable simulation</i> Built computer-vision pipeline with OpenCV and LLaVA to convert drawn levels into executable game layouts.	Sep 2025
UAV Detection Evaluation <i>Aerial perception research</i> Benchmarked small-object tracking methods under motion and low-pixel-count detection conditions.	Mar 2026 - Present
